

Disendra Gosu

Mobile: +91-8919484183

Email: disendra123@gmail.com

OBJECTIVE:

I wish to use my technical expertise, skills and zeal to learn and apply knowledge of new technologies in a supporting environment that provides new opportunities and challenges alike.

SUMMARY:

- I have around **3 years** of experience in developing application using UI technologies.
- Very good knowledge in UI Development Technologies, Frameworks and Single Page Application (SPA) like **Angular, JavaScript, HTML5, CSS3, Bootstrap4, Typescript** and **JSON**
- I have strong knowledge in **Nodejs, Java** and databases like **Oracle** and **Solr**.
- Actively involved in total end to end software model in mapping client's requirements, application design, development & integration.
- Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts & utilize the same in a productive manner.
- Hands on experience in **GIT** repository.
- Experience in **Object Oriented JavaScript** Analysis and **Typescript**
- Develop user interface of application in an agile environment.
- Good Communicator, being able to express ideas clearly and concisely.
- Develop user interface of application in an agile environment.

TECHNICAL SKILLS:

Expertise Area	Application using UI Development Technologies and Framework, Scripting like JavaScript, Single Page Application (SPA).
UI Frameworks & Technologies	Angular 18, JavaScript, HTML5, CSS3, Bootstrap4
Backend Technologies	Nodejs, Core java
Database	MySQL, PLSQL, Solr
Cloud Technologies	AWS, Google Cloud
IDE Tools	Visual Studio Code, Eclipse Notepad++
Debugging Tool	Chrome Developer Tool
Version Control Tool	GIT, GITHUB
Other Skills	RWD, NPM, Azure

QUALIFICATION:

Bachelors in science (2021)
Under Kakatiya University.

EXPERIENCE:

1. Softsol India Ltd.

Feb 2022 – till date

Angular Developer, UI developer, Full stack Angular Developer

2.Revalsys Technologies.

Jul 2024 – till date

Angular Developer, UI developer, Full stack Angular Developer

PROJECTS & DESCRIPTION:

1.Project: revalERP.

Description:

CRM tool, including HRMS portal-related functionalities

Responsibilities:

- **SPA Development & Routing:** Implemented Single Page Application (SPA) architecture, ensuring smooth navigation and optimized user experience with routing.
- **Dynamic Form Generation:** Designed and developed dynamic form controls, leveraging API responses to render forms dynamically. Generated the Queries in Solr Databases by using postman
- **Lazy Loading Implementation:** Applied lazy loading techniques to enhance application performance by loading modules and components on demand.
- **Responsive UI Development:** Utilized Bootstrap grid system and CSS media queries to ensure the application is responsive across various device sizes and resolutions.
- **Client-side Validation:** Implemented client-side validation using Regular Expressions to ensure form data integrity and provide immediate feedback to users.
- **API Integration:** Integrated various backend services using RESTful APIs and Spring framework, ensuring seamless communication between the frontend and backend.
- **Performance Optimization:** Applied best practices for improving application performance, including lazy loading, code splitting, and optimizing component re-renders.
- **Issue Resolution & Enhancements:** Actively participated in resolving application-related issues and implementing feature enhancements.
- **Debugging & Troubleshooting:** Used browser developer tools for JavaScript and Angular debugging to identify and resolve issues efficiently.
- Used Bootstrap grid system and CSS Media Quires to fit the application in different viewport sizes.

Environment: HTML5, JavaScript, CSS3, Bootstrap, Typescript, Angular14, Solr Database, VS Code IDE, postman

2. Project: IIB(Insurance Information Bureau of India) Description:

A platform providing insurance-related services

Responsibilities:

- **Client-Side Validation:** Implemented client-side validation using Regular Expressions to ensure data integrity and enhance form submission security. Created the forms using HTML, CSS, Typescript and Angular 14.

- **Form Development:** Developed dynamic forms using HTML, CSS, TypeScript, and Angular 14 to meet UI/UX requirements.
- **API Development:** Designed and implemented APIs using Node.js for efficient data exchange between the frontend and backend
- **RESTful Services Integration:** Consumed and developed RESTful web services in Angular to fetch and manage data effectively.
- **Resolution & Enhancements:** Actively contributed to resolving application-related issues and implementing feature enhancements to improve functionality and user experience.
- **Component & Module Creation:** Built reusable components and modules in Angular to structure the application and improve maintainability.

Environment: Nodejs, HTML5, JavaScript, CSS3, Bootstrap, ES6, Angular14, Solr GIT, GITHUB

3. Project: Watch Station INDIA.

Description:

E-commerce platform for selling watches and accessories

Responsibilities:

- **E-commerce Frontend Development:** Developed user interfaces using Angular and TypeScript to create a responsive and intuitive shopping experience
- **Component & Module Development:** Designed reusable Angular components and modules for product listings, search functionality, and checkout process.
- **API Development:** Designed and implemented APIs using Node.js for efficient data exchange between the frontend and backend.
- **Integration with Backend Services:** Integrated frontend with RESTful APIs to fetch product data, handle user authentication, and manage shopping cart functionalities.
- **Form Handling & Validation:** Implemented dynamic forms for user registration, login, and checkout using Angular forms, with client-side validation using Regular Expressions.
- **Performance Optimization:** Applied lazy loading and Angular optimization techniques to enhance application performance, reducing load times and improving user experience.
- **UI/UX Enhancements:** Worked with design teams to ensure the application is visually appealing and provides a seamless shopping experience across devices.
- **Payment Gateway Integration:** Integrated third-party payment gateways for secure online transactions, ensuring a smooth checkout process.
- **Bug Fixes & Enhancements:** Collaborated in identifying and resolving application bugs and implementing feature enhancements based on user feedback.

Environment: Angular12, HTML5, JavaScript, CSS3, Bootstrap, ES6, Solr ,GIT, GITHUB

4. Project: RevalMaps.

Description:

A platform that analyzes and visualizes sales or transaction data through interactive maps.

Responsibilities:

- **Map Integration:** Integrated interactive maps to visualize sales and transaction data, enabling users to explore geographic trends and insights.
- **Data Visualization:** Used mapping libraries (like Leaflet or Google Maps API) to display detailed data overlays on maps, providing users with a clear understanding of transaction patterns.
- **Angular Development:** Developed dynamic, data-driven components using Angular to display transaction data and interact with map visualizations seamlessly.
- **API Integration:** Consumed and integrated backend APIs to fetch transaction data and display it on the maps, ensuring real-time updates and accuracy.
- **Performance Optimization:** Implemented lazy loading for map components and optimized data queries to ensure fast rendering and improved application performance.
- **User Interaction:** Enabled user interaction with the map, such as zooming, panning, and clicking on map markers to display detailed transaction information.
- **Responsive Design:** Ensured the map and transaction data visualizations were responsive and accessible across all device sizes using CSS and Angular tools.
- **Feature Enhancements:** Collaborated with product teams to implement new features and improvements, such as custom map markers and filters to refine data visualizations.

Environment: Nodejs, HTML5, JavaScript, CSS3, Bootstrap, ES6, Angular18, Solr GIT, GITHUB
